Question 1. Which statement best describes a local unit test?

Choose one:

- Tests that run on an Android-powered device or emulator and have access to the Android framework.
- Tests that enable you to write automated UI test methods.
- Tests that are compiled and run entirely on your local machine with the Java Virtual Machine (JVM).

Answer 1

Tests that are compiled and run entirely on your local machine with the Java Virtual Machine (JVM).

Question 2

Source sets are collections of related code. In which source set are you likely to find unit tests?

Choose one:

- app/res
- com.example.android.SimpleCalcTest
- com.example.android.SimpleCalcTest (test)
- com.example.android.SimpleCalcTest (androidTest)

Answer 2

com.example.android.SimpleCalcTest (test)

Question 3

Which annotation is used to mark a method as an actual test?

Choose one:

- @RunWith(JUnit4.class)
- @SmallTest
- @Before
- @Test

Answer 3 @Tes
